-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claims 1-4 are objected to because of the following:
  - In line 6, “code” has been misspelled as “cord” (claim 1); “control device” should be “control unit” (claim 2) to maintain term consistency; “signals wires” should be “signal wires” (claim 3); and a comma is missing before “coil antenna” (claim 4, line 3).

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 03/037483 A1, hereinafter ‘483. ‘483 teaches a filter core controller device including read/write microchips 6 on filter cores 2, 3 and a control unit 4 for reading the codes in the chip to determine the filter core identity and if an accumulated time of operation is exceeded (page 17) [as in claim 1]. A communicating means including an antennae 7 is used to transmit information

Art Unit: 1723

wirelessly from chips 6 [as in claims 2 and 6] and signal wires are used to transmit to the unit 4 [as in claims 3 and 7]. The unit 4 also includes a timer and display device and the microchip is password protected [as in claim 5].

4. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Den Dekker (U.S. 5,674,381).

Den Dekker teaches a core 2 having reader/label 5,6 for determining filter identity and total usage time. The system uses chip cards and wireless transmission as well as signal wires [as in claims 1-3 and 5-8].

*Claim Rejections - 35 USC § 103*

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Den Dekker in view of Hunter (U.S. 6,558,444). Hunter teaches a coil for an antenna [as in claims 4 and 8]. It is considered that it would have been obvious to one ordinarily skilled in the art at the time of the invention to have the coil antenna of Hunter in the invention of Den Dekker, since Hunter teaches the benefit of wireless transmission to determine if the correct filter is installed.
